Petition for a Car-Free Central Park

Transportation ALTERNATIVES

Return to: Transportation Alternatives, 127 W. 26th Street, #1002, New York, NY 10001, Fax 212-629-8334

Central Park, our nation's foremost urban park, was created as a refuge from the surrounding city. The presence of automobile traffic on Central Park's loop drive is undermining the park's status as a refuge and creating a grave safety hazard for recreational users.

For these reasons, we the undersigned support the elimination of all regular automotive traffic from the loop drive and the return of the drive to recreational use only.
